

Pedestrian Bridges

Big R Bridge has become one of the leading pedestrian bridge fabricators in the United States. Providing bridging solutions for over 30 years, our pedestrian bridges have been installed from coast to coast.

We have furnished bridges for golf courses, resorts, private developers, national parks, national forests, industrial walkways and on many state department of transportation projects.

- 1** Underhung truss at a private development in Broomfield, Colorado.
- 2** 276' long (three-span) weathering steel bridge with horizontal safety rails in Fallbrook, California.
- 3** Concrete deck pedestrian bridge in Denver, Colorado painted to city specifications.
- 4** Modified bow truss in Eagle, Colorado.
- 5** Double diagonal truss design with hardwood timber deck in Taylorsville, Utah.

2
