Steel Cattle Guard
Big R Bridge fabricates cattle guards to a variety of specifications, including those issued by state and federal agencies. We roll form our trademark rail sections using Grade 50 steel. The rail is welded to stringers (usually an 8” wide flange) and the finished cattle guards are cleaned and painted to the customer specifications. Big R Bridge also furnishes wing sections and pre-cast concrete bases for cattle guards.

**Standard Features**
- HS-20 loading
- Sizes from 8’ to 20’
